Petition Calling on U.S. Senators Patty Murray & Maria Cantwell to Cosponsor S. 1804, the Medicare for All Act

We, the undersigned residents of Washington, request you to cosponsor S.1804, which would establish a Medicare-for-all national health insurance program and finally make healthcare a human right in the United States. This legislation would provide comprehensive care - including reproductive, mental health, dental, and vision - for every resident of the U.S., paid for by a public insurance system.
